To the users of the ALGOL 60 Compiler for
IBM 1130
To the users of the IBM 1130 Computing System

Gentlemen,

It is with pleasure that we announce Version 2 of the ALGOL 60,
IBM 1130 Compiler.

This Compiler, compatible with the Disk Monitor System, Version 2
was achieved at the University of Grenoble (France) by the
originators of Version 1, D. LECARME and C. BELLISSANT, who
have since entrusted us with its maintenance and distribution.
For your information, a certain number of errors in the Version 1
have been corrected and the Compiler at disposal today may be
considered reliable and operative.

The minimum configuration required is as follows :

- 1131 Central Processing Unit with disk, 8K core
(16K recommended)
- 1442 or 2501 Card Reader
- 1132 or 1403 Printer

ALGOL Programs also allow the use of the following units :

- Keyboard and Console Printer
 - 1442 Card Punch
 - 1134/1055 Papertape Read /punch
 - 1627 Plotter
 - WS of Disk
- If this new ALGOL Compiler is of interest to you, please complete
and return the attached form upon receipt of which, we will
forward the Compiler to you free of charge.
 - If you are no longer interested, we would appreciate it if you
would nevertheless complete and return the form in order to
enable us to bring our card file up to date.
 - If you know of other persons or institutions who may be
interested in this Compiler, we would appreciate it very
much if you would either send them the reply form or send
us the address that we may write to them direct.

If there is any further information you require, please do not
hesitate to so advise.

Yours very truly,

N. Ebel

F. Martin
