

VMS CONSOLIDATED DISTRIBUTION—NOVEMBER 1992

AV-PSQEB-TE

CD-ROM Packaging Changes

Beginning with the November releases of the *VMS Consolidated Distribution* and the *VMS Online Documentation Library*, a redesigned CD-ROM folder is being adopted for distributing various online information products to Digital¹ customers. The primary benefits of this replacement folder are: ease of use, expandability (up to 12 discs), and recycleability in its entirety.

Multiple Versions of VMS DECwindows Motif on November Consolidated Distribution

The November Consolidated Distribution of binaries and online documentation contains two versions of VMS DECwindows Motif. The following VMS DECwindows Motif binaries and documentation are included on the CD:

- **Binaries:**
 - VMS DECwindows Motif V1.0 binaries
 - VMS DECwindows Motif V1.0A (Mandatory Update) binaries
 - VMS DECwindows Motif V1.1 binaries
- **Documentation:**
 - VMS DECwindows Motif User Documentation Kit V1.0 and V1.1
 - VMS DECwindows Motif Programmer Documentation Kit V1.0 and V1.1
- **Multi-language support:**
 - VMS DECwindows Motif/Language Variant Kits V1.0

You can install either Version 1.0 and Version 1.0A of VMS DECwindows Motif or Version 1.1 of VMS DECwindows Motif. Version 1.0A addresses end-user problems in the Version 1.0 kit. The Version 1.1 kit eliminates these problems and contains additional functionality.

Documentation Support

The contents of the VMS DECwindows Motif User Documentation Kit and the VMS DECwindows Motif Programmer Documentation Kit have not changed from Version 1.0 to Version 1.1 of VMS DECwindows Motif.

The following information, however, is new for VMS DECwindows Motif Version 1.1 and has been included on your November Consolidated Distribution CD:

- VMS DECwindows Motif V1.1 Installation Guide
- VMS DECwindows Motif V1.1 Release Notes
- VMS DECwindows Motif V1.1 Cover Letter
- VMS DECwindows Motif V1.1 Software Product Description (SPD) 36.09.03
- VMS DECwindows Motif V1.1 System Support Addendum (SSA) 36.09.03A

Language Variants of DECwindows Motif

The language variants of DECwindows are available as options to the VMS DECwindows Motif product. Language variants are only supported when the version number of the language variant matches the version number of VMS DECwindows Motif.

NOTE

DO NOT INSTALL A VERSION 1.0 LANGUAGE VARIANT ON VMS DECWINDOWS MOTIF V1.1.

NAS CD-ROM Now Included with VMS Consolidated Distribution

We are happy to announce that the NAS CD-ROM is now included as part of the VMS Consolidated Distribution. In response to customer demand, this change has been made for the convenience of VMS Consolidated Distribution customers who have purchased licenses for the NAS Integrated Products.

Network Application Support (NAS) is a set of standards-compliant software that resides above the base platform (hardware and operating system). This NAS software provides a consistent interface to support applications running on different platforms. The NAS Integrated Products (NAS 200, NAS 250, NAS 300, and NAS 400) merge a set of components that enable the creation of runtime clients and servers. The NAS Integrated Products delivered on the NAS CD-ROM provide NAS customers with a fully integrated and tested run-time environment. The NAS CD-ROM provides the software binaries and online documentation sets for the NAS Integrated Products. If you have a license for a NAS Integrated Product, please be sure to use the NAS CD-ROM to install the component software products.

The NAS Installation Guide is available on the NAS CD-ROM in the following directories, where *nnn* is the particular NAS Integrated Product you are installing:

- [ASCII_I_GUIDES.NAS*nnn*]
- [POSTSCRIPT_I_GUIDES.NAS*nnn*]

If you do not have a NAS Integrated Product license and would like more information, please call 1-800-DIGITAL or your local Digital account representative.

Removal of DECmcc TCP/IP SNMP AM V1.1A from the Consolidated Distribution

DECmcc TCP/IP SNMP AM V1.1A is being retired as a separate product and is now included in DECmcc Director V1.2, as well as DECmcc BMS V1.2 and DECmcc EMS V1.2.

VAX DBMS RTO V4.3 Problem in September 1992 Consolidated Distribution

The VAX DBMS RTO V4.3 installation error that occurred in the September Consolidated Distribution has been corrected in this release. Please do not attempt to install VAX DBMS RTO V4.3 from the September disc.
