Subj: November CDROM does not have DECDESIGN and DATATRIEVE patches for CDD

This is to let you all know that yet again, the November CDROM distribution does not have the required DECDESIGN and DATATRIEVE patches required to run with CDD/Repository. These were also omitted from the September distribution.

Customers will be calling because the installation guide for CDD/Repository states these patches are required for the above products.

The issue is being escalated.

Subj: November CDROM and DECDESIGN, DATATRIEVE patches for CDD

As an additional note to Mary Jo's mail--

The articles in the database and the patches we created to take care of this problem for the September cdrom still apply:
CSCPAT_0362 is for DECDESIGN; CSCPAT_0361 is for Datatrieve V5.1.

thanks,
Cynthia
