INTRODUCTION

This manual contains schematic drawings and cable diagrams of the following products:

- Model 100 System
- Model 400 System
- Model 500/520/600 Calculators
- Model 700/720 Calculators
- Model 1200 System
- Model 2200 System
- Peripherals of 500/520/600/700/720/2200
- DIABLO Series 40 Disk Drive

The schematics are arranged in sections in the order listed above. A colored title and table of contents sheet begins each section. The schematics in each section are arranged in ascending numerical order by printed circuit board number disregarding F and L prefixes. Pertinent power supply schematics and cable diagrams are placed at the end of each section. Due to the unavailability at time of publication, some schematics and cable diagrams are missing, especially on newer products. Rough engineering drawings and preliminary drawings are not usually incorporated in this manual.

This manual will periodically be updated to include drawings and schematics of newly manufactured products, and drawings that are now sketches or not finalized.

The Model 300 series drawings are not included in this manual because of a prior publication *Series 300 Drawings* (03-0007-0) which incorporated all 300 schematic diagrams. All copies of this manual are exhausted and there are currently no plans to reprint due to expense and low priority.

Publication of this new schematic manual eliminates schematic diagrams from future Service Bulletins; bulletins will have assembly drawings only if available at time of publication.

In order to improve this publication, use the business reply form on the next page to send suggestions or requests for drawings which may have been omitted; these will be incorporated in the next update.
